

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A tongue depressor for receipt within a mouth of a patient during an examination, comprising:

 a blade comprising first and second sides separated by a thickness of said blade, said blade further comprising first and second tongue contact portions located along said first and second sides, respectively; and

 an ornamental image appearing along at least a portion of at least said first tongue contact portion of said first side;

wherein said tongue depressor is the standard size used with youthful patients;

wherein said tongue depressor is not coated with flavor;

Wherein both ends of said tongue depressor may be safely received within said mouth of said patient during said examination without causing any discomfort or physical harm;

wherein said tongue depressor does not have a protective layer;

 wherein any portion of said tongue depressor blade may be received within said mouth of said patient during said examination, even if said any portion of said tongue depressor has said ornamental image appearing therealong.

Claim 2 (original): A tongue depressor as recited in claim 1, said ornamental image appearing along both said first tongue contact portion and said second tongue contact portion of said blade.

Claim 3 (original): A tongue depressor as recited in claim 1, further comprising another ornamental image appearing along at least a portion of at least said second tongue contact portion of said blade, wherein even a portion of said tongue depressor blade bearing said another ornamental image may be received into said mouth of said patient.

Claim 4 (original): A tongue depressor as recited in claim 3, wherein said ornamental image and said another ornamental image are the same.

Claim 5 (original): A tongue depressor as recited in claim 3, wherein said ornamental image and said another ornamental image are different.

Claim 6 (currently amended): A tongue depressor as recited in claim 3, wherein said ornamental image and said another ornamental image are made of non-toxic ink [approved by the U.S. Food and Drug Administration] for application to items to be received within a person's mouth.

Claim 7 (canceled)

Claim 8 (original): A tongue depressor as recited in claim 1, wherein said tongue depressor is made of wood.

Claim 9 (original): A tongue depressor as recited in claim 1, wherein said tongue depressor is made of plastic.

Claim 10 (original): A tongue depressor as recited in claim 1, wherein said tongue depressor is made of cardboard.

Claim 11 (original): A tongue depressor as recited in claim 1, wherein said tongue depressor is sterile.

Claim 12 (currently amended): An apparatus for motivating the cooperation of youthful patients in oral examinations, comprising a tongue depressor for restraining a tongue of a patient to allow clearer examination of a rear of a patient's mouth and throat, comprising a blade having two elongated, substantially flat surfaces for restraining said tongue of said patient, at least one of said two surfaces bearing an ornamental image along at least a portion thereof intended to be inserted into said patient's mouth, said ornamental image being made from non-toxic [U.S. Food and Drug Administration approved] ink.

Claim 13 (new): A tongue depressor as recited in claim 1, wherein said ornamental image substantially covers the entire surface of said blade;

Claim 14 (new): A tongue depressor as recited in claim 1, wherein said ornamental image include designs that appeal to children;

Claim 15 (new): A tongue depressor as recited in claim 1, wherein said image consists of at least two colors;

Claim 16 (new): A tongue depressor as recited in claim 3, wherein said ornamental image and said another ornamental image contain designs with repeating patterns from end to end of blade;

Claim 17 (new): A tongue depressor for receipt within a mouth of a patient during an examination, comprising:

- a blade comprising first and second sides separated by a thickness of said blade, said blade further comprising first and second tongue contact portions located along said first and second sides, respectively; and

- an ornamental image appearing along at least a portion of at least said first tongue contact portion of said first side;

- wherein said ornamental image substantially covers the entire surface of said blade;

- wherein said ornamental image include designs that appeal to children;

- wherein said image consists of at least two colors;

- Wherein said tongue depressor is not coated with flavor;

- wherein said tongue depressor does not have a protective layer;

- Wherein both ends of said tongue depressor may be safely received within said mouth of said patient during said examination without causing any discomfort or physical harm;

- wherein any portion of said tongue depressor blade may be received within said mouth of said patient during said examination, even if said any portion of said tongue depressor has said ornamental image appearing therealong.

Claim 18 (new): A blade like object suitable for children to use and enjoy outside the medical environment, comprising a blade having two elongated, substantially flat surfaces, at least one of said two surfaces bearing an ornamental image along substantially the entire surface thereof, said ornamental image being made from non-toxic ink,

wherein said ornamental image include child-oriented designs that appeal to children;

wherein said ornamental image consists of at least two colors;

Wherein said blade is not coated with flavor;

wherein said tongue depressor does not have a protective layer;

wherein both ends of said blade may be received within the mouth of said children.
